I will set my computer to hibernate after 15 minutes of inactivity and shut it down when I’m not using it.

I will turn off lights when leaving a room, or when I notice a light left on in an unoccupied space.

I will use CFL bulbs.

I will use natural light whenever possible.

I will take cooler and/or shorter showers.

I will purchase EnergyStar rated products.

I will take the stairs instead of the elevator.

I will unplug my cell phone charger, and other small devices when it has finished charging to prevent vampire energy.

I will lead by example, and voice my concern about energy conservation on campus.

ENERGY CONSERVATION PLEDGE

I understand though I am only one person, my choices impact the sustainability of the UNCG campus. By working together as a campus of proactive students, faculty, and staff we can further reduce the carbon emissions of UNCG and work toward becoming a carbon neutral university. I will do my part by helping eliminate sources of wasteful and inefficient energy. I will help UNCG reduce its energy consumption by 5% over the next year.
